

Trending Topics you must know as an MBA aspirant

1) Climate Change and Extreme Weather

- 2025 is on track to be the second or third-hottest year on record globally — signaling the worsening impact of global warming.
- Extreme weather events (floods, cyclones, heatwaves) are increasingly impacting Asia and other vulnerable regions, affecting infrastructure, human lives and migration.
- This raises important questions on climate resilience, sustainable development, corporate ESG responsibility and long-term socio-economic planning.

2) Reserve Bank of India's Monetary Policy & India's Economic Growth Trajectory

- Recently, RBI cut the repo rate by 25 basis points to 5.25%, coupled with liquidity boost measures — part of an easing move to support growth amid global headwinds.
- Despite global challenges, India's macroeconomic fundamentals remain resilient: growth, consumption demand, services sector strength continue to show promise.
- This opens discussion on macroeconomic stability, monetary policy, inflation vs growth trade-offs, interest rates etc.

3) Major operational disruption at IndiGo — showing risks of dominance

- In December 2025, IndiGo cancelled thousands of flights across the country – stranding tens of thousands of passengers.
- The aviation regulator Directorate General of Civil Aviation (DGCA) has ordered IndiGo to cut scheduled flights by 5%, especially on competitive routes, following the crisis.
- The disruption stemmed largely from poor pilot-roster planning after new pilot rest/time limits (“fatigue management”) rules — a case that highlights how regulatory compliance, human-resource planning and operational scale all matter deeply in aviation.
- This episode exposed how heavily the Indian domestic aviation market relies on a single dominant player — a point with big implications for competition, consumer welfare, and regulatory oversight.
