QUESTION PAPER WITH SOLUTIONS

QUANTITATIVE ABILITY

1. Present sum of money amounts to Rs. 800 in two years and to Rs. 920 in three years, then the present sum of money is
(a) 420 (b) 690
(c) 560 (d) None of the options
2. Bhavani invested an amount of Rs. 13900 divided in two different schemes, A and B at the simple interest rate of 14% per annum and 11% per annum respectively if the total amount of simple interest earned in two year be Rs. 3508, what was the amount invested in Scheme B?
(a) 6400 (b) 6500
(c) 7200 (d) 7900
3. What is the square of root of 99999 ?
(a) 316.23 (b) 316.22
(c) 316.21 (d) 316.20
4. What is cube root of 55555 ?
(a) 38.17 (b) 38.16
(c) 38.15 (d) 38.14
5. In a factory there are three types of machines b1, b2, and b3 which produces 20%, 15%, and 32% of the total products respectively. Further, machines b1, b2, and b3 which produces 3%, 7%, and 2% defective products respectively. Find the percentage of nondefective products?
(a) 46% (b) 30%
(c) 53% (d) 64%
6. In a 1000 meter race Rishi beats Koustab by 50 meters. In the same race, by what time margin Koustab beat Pandey who runs at 4 meter per second?
(a) 100 (b) 50
(c) 75 (d) Data insufficient
7. Guru and Chela walk around a circular path of 115 km in circumference, they start together from the same point. If they walk at speed of 4 and 5 kmph respectively, also they walk in the same direction, when will they meet?
(a) After 115 hours (b) After 125 hours
(c) After 120 hours (d) After 210 hours
8. Five racquets needs to be placed in three boxes. Each box can hold all the five racquets. In how many ways can the racquets be placed in the boxes so that no box can be empty if all racquets are different but all boxes are identical?
(a) 24 (b) 25
(c) 27 (d) 26
9. How many signposts can be made using 6 different coloured symbols when any number of them can be posted at a time?
(a) 1988 (b) 1976
(c) 1966 (d) 1956

10. There are 12 copies of Beatles CDs, 7 copies of Pink Floyd CDs, 3 different CDs of Michael Jackson, and 2 different CDs of Madonna. Find the number of ways in which one or more than one CD can be selected?
- (a) 3388 (b) 3376
(c) 3366 (d) 3327
11. Please calculate in how many ways can a platoon of sixteen soldiers be chosen out of a total of twenty soldiers for a surgical strike?
- (a) 4845 (b) 4800
(c) 4855 (d) 4955
12. A box contains 2 white shirts, 3 black shirts, and 4 red shirts. In how many ways can 3 shirts be drawn from the box, if at least one black shirt is to be included in the draw?
- (a) 60 (b) 40
(c) 64 (d) 82
13. Can you calculate in how many ways can 7 tennis players can be seated in a circular order?
- (a) 330 (b) 730
(c) 720 (d) 820
14. Imagine that there are four hundred and fifty nine managers in a hotel. If the number of managers is enlarged by 36, the expenses of the food increased by Rs. eighty one per day while the average spending per head decreased by one. Find the original spending of the hotel on food?
- (a) 7344 (b) 7244
(c) 7044 (d) 7444
15. The average age of a group of 9 friends is 22 years. LAVGIR is the youngest and his age is 6 years, then what happened to be the average age of the family just before LAVGIR was born?
- (a) 18 (b) 7
(c) 20 (d) 24
16. The height of nineteen people of comic book is in Arithmetic progression. The average height of them is 19 feet. If the tallest is 37 feet. Then what is the height of the shortest?
- (a) 2 (b) 1
(c) 3 (d) 4
17. Average stipend of summer internship of an institute is Rs. 20000 per month. Recently the institute announced increment of Rs. 2000 per month for all the students. The new average stipend of students will now be?
- (a) 22000 (b) 23000
(c) 24000 (d) 25000
18. The average presence of employees of a company for yoga sessions in an office on Monday, Tuesday and Wednesday is thirty two and on the Wednesday, Thursday, Friday and Saturday is thirty. If the average number of employees on all the six days is twenty six then the number of employees who attended the sessions on Wednesday is?
- (a) 38 (b) 40
(c) 60 (d) 64

19. The average spending of Lata Mangeshkar for the part of week from Monday to Saturday is Rs. 4200 . She spent Rs. 1200 on Monday and Rs. 1500 on Sunday that week. The average spending for the part of week from Tuesday to Sunday that week is?
- (a) 4100 (b) 4200
(c) 4250 (d) 4300
20. Please calculate in how many ways can a set of five players be formed out of a total of ten players such that two particular players should be involved in each set?
- (a) 60 (b) 72
(c) 56 (d) 75

A Place to Learn, A Place to Grow

LOGICAL REASONING

Directions (Q.21-Q.22): Answer the following questions based on the given information:

Eight Girls M, N, O, P, Q, R, S and T are sitting in a line facing north and likes different colours such as Red, Pink, Yellow, White, Blue, Violet, Brown and Black but not necessarily in the same order.

The one who likes yellow sits fourth to the right of M. Neither M nor yellow sits at extreme ends. N sits third to the left of R. The number of girls sits between T and the one who likes violet is same as S and the one who likes blue. T sits to the immediate left of black. The number of girls sits between the one who likes red and white is same as the one who likes white and pink. P does not sit adjacent to T. R likes violet colour and O likes brown colour. One person sits between S and the one who likes yellow. S does not like red colour and does not sit at any of the extreme end.

21. How many girls sit between M and N ?
(a) One (b) Two
(c) Three (d) Four
22. T likes which of the following colour?
(a) White (b) Yellow
(c) Pink (d) Brown
23. B is the father of Q. B has only two children. Q is the brother of R. R is the daughter of P. A is the granddaughter of P. S is the father of A. How is S related to Q?
(a) Son (b) Son-in-law
(c) Brother (d) Brother-in-law

Directions (Q. 24): Six dice with upper faces erased are as shows.

The sum of the numbers of dots on the opposite face is 7.

24. If the odd numbered dice have even number of dots on their top faces, then what would be the total number of dots on the top faces of their dice?
(a) Eight (b) Ten
(c) Twelve (d) Fourteen
25. In a certain code, 15789 is written as XTZAL and 2346 is written as NPSU. How is 23549 written in that code?
(a) PNTSL (b) NPTUL
(c) NPTSL (d) NBTSL

26. Saurabh walks 80 meters towards south. Then, turns to his right & starts walking straight till he completes another 80 meters. Then, again turning to his left he walks for 60 meters. He then turns to his left & walks for 80 meters. How far is he from his initial position?
- (a) 100 meters (b) 60 meters
(c) 20 meters (d) 140 meters
27. Fact 1: All cats like to run.
Fact 2: Some cats like to swim.
Fact 3: Some cats look like their masters.
If the first three statements are facts, which of the following statements must also be a fact?
- (I) : All cats who like to swim look like their masters.
(II) : cats who like to swim also like to run.
(III) : cats who like to run do not look like their masters.
- (a) I only (b) II only
(c) II and III only (d) None of the statements is a known fact.
28. Nurse Kemp has worked more night shifts in a row than Nurse Rogers, who has worked five. Nurse Miller has worked fifteen night shifts in a row, more than Nurses Kemp and Rogers combined. Nurse Calvin has worked eight night shifts in a row, less than Nurse Kemp. How many night shifts in a row has Nurse Kemp worked?
- (a) 8 (b) 9
(c) 10 (d) 11
29. P, Q, R and T answered an Examination. In the results, Q was immediately followed by P but no one was there after P. R was ahead of Q but could not score as much as T. Who scored the second highest?
- (a) P (b) Q
(c) R (d) T
30. In this question, one term in number series is incorrect. Find out the incorrect number.
56, 72, 90, 110, 132, 139
- (a) 72 (b) 110
(c) 132 (d) 139
31. In a procession, 7 boys are standing in a row. Kavikant is standing left to Anurag but right to Bipin. Jayant is standing right to Gourav and left to Bipin. Similarly, Komal is standing right to Anurag and left to Ramu. Find out who is standing in the middle.
- (a) Anurag (b) Komal
(c) Kavikant (d) Gourav
32. A total of 78 celebrities were standing in a row. Karan Johar was standing at the 25 th position from the left. Salman Khan was standing at 20th position from the right. How many celebrities were standing between Karan Johar and Salman Khan?
- (a) 31 (b) 32
(c) 33 (d) 34
33. Find the missing number in the given series 12, 38, 116, 350, 1052, ?.
- (a) 2200 (b) 1800
(c) 3158 (d) 2800

34. If $A + B$ means A is the brother of B;
 $A - B$ means A is the sister of B;
 $A \times B$ means A is the father of B.
 Which of the following means that 'C is the son of M' ?
- (a) $M - N \times C + F$ (b) $F - C + N \times M$
 (c) $N + M - F \times C$ (d) $M \times N - C + F$
35. Following analogy shows the relationship between two words. Select the pair which has the same relationship.
 "Theft: Confess"
- (a) Fight: Dare (b) Fault : Admit
 (c) Murder: Commit (d) Mistake: Agree

Direction (Q.36-Q.37): Considering given statements as true, select a logical conclusion based on the given statements.

36. Statements:
 Some ships are boats.
 All boats are submarines.
 Some submarines are yatches.
 Conclusion:
- I. Some yatches are boats.
 II. Some submarines are boats.
 III. Some submarines are ships.
 IV. Some yatches are ships
- (a) Only II and III follow (b) All follow
 (c) Only III follows (d) Only IV follows
37. Statements:
 Some Google is Twitter.
 No Twitter is Facebook.
 All Facebook are WhatsApp.
 Conclusions:
- (I) Some WhatsApp are Google is a possibility.
 (II) Some Twitter can never be Facebook.
- (a) Only conclusion I follows. (b) Only conclusion II follows.
 (c) Either conclusion I or conclusion II follows. (d) Both conclusions I and II follow.

Direction (Q.38-Q.39): Answer the questions based on following information.

In a trade fair 7 cars of different companies Cadillac, Ambassador, Fiat, Maruti, Mercedes, Bedford and Fargo are standing facing to east in the following order: Cadillac is next to right of Fargo. Fargo is fourth to the right of Fiat. Maruti car is between Ambassador and Bedford. Fiat which is third to the left of Ambassador, is at one end.

38. Which of the cars are on both the sides of Cadillac car?
- (a) Ambassador and Maruti (b) Maruti and Fiat
 (c) Fargo and Mercedes (d) Ambassador and Fargo

39. Which of the following statement is correct?
- (a) Maruti is next left of Ambassador. (b) Bedford is next left of Fiat.
(c) Bedford is at one end. (d) Fiat is next second to the right of Maruti.
40. If A stands for ' + ', B stands for ' - ', C stands for ' x ', what is the value of $(10C4) (A) (4C4)B6$?
- (a) 60 (b) 50
(c) 56 (d) 46

A Place to Learn, A Place to Grow

ENGLISH LANGUAGE

Directions (Q. 41 and Q.42): Each question consist of two words which have a certain relationship to each other followed by four pairs of related words, Select the pair which has the same relationship.

41. SEDATIVE : SLEEP
(a) challenging: knowledge (b) mnemonic: memory
(c) vocal : eloquence (d) dramatic: story
42. JEOPARDY: PERIL
(a) Jealousy : Envy (b) Jealousy : Lust
(c) Jealousy : Secure (d) Jealousy : Romance

Directions (Q. 43 and Q.44): In each of the following questions, a word has been used in sentences in four different ways. Choose the option corresponding to the sentence in which the usage of the word is INCORRECT or INAPPROPRIATE.

43. Agog
(a) The boys were all agog to see their parents.
(b) She was all agog at the surprise announcement
(c) The victory set the whole state agog with excitement.
(d) All are correct
44. Tantamount
(a) To leave a pet home alone is tantamount to cruelty.
(b) Overlooking state norms tantamounts to a crime.
(c) His refusal to answer was tantamount to an admission of guilt.
(d) All are correct

Directions (Q. 45 and Q.46): In the question given below two statements are given which are grammatically correct and meaningful. Connect them by choosing the word given below the statements in the best possible way without changing the intended meaning. Choose the best possible word as your answer accordingly from the options to form a correct, coherent sentence.

45. (I) Especially in their own languages because it ensures a better understanding of subjects
(II) Of the important themes are to ensure that students have ready access to the right learning material
(a) each (b) someone
(c) some (d) one
46. (I) The unemployment rate has dropped sharply this quarter.
(II) It may only be temporary.
(a) But (b) Likewise
(c) Though (d) Still

Directions (Q. 47 and Q.48): In the question given below few sentences are given which are grammatically correct and meaningful. Connect them by the word given before the statements in the best possible way without changing the intended meaning. Choose your answer accordingly from the options to form a correct, coherent sentence.

47. "But"

- (I) Doordarshan is also a great window to the global market place. Goods and services are continuously being sold through Doordarshan's dream world.
 - (II) All news is elite centered; but Doordarshan telecast is usually more ethnocentric. Its accent is on people, places and events.
 - (III) With over 1 billion people talking in several languages and a variety of lifestyles to boot, it is obvious one cannot address all of them together all the time.
 - (IV) Doordarshan's promotions must go beyond mere reportage of facts, and capture the story between the lines.
- (a) I-III (b) II - IV
(c) III - IV (d) I-II

48. "Because"

- (I) It is ironic, not tragic, that minorities in our country have come to be identified with religion and not with community or profession.
 - (II) The establishment of many such organizations are testimony to the growing antagonism to secularism.
 - (III) Secularism today is being taken as a threat to religious identities, to the existence of religious diversities, though secularism was never conceived as such.
 - (IV) This is the reason that secularism today has come to mean as preservation of religious minorities in their traditional modes.
- (a) II - III (b) I-IV
(c) III - IV (d) I - II

Direction (Q.49): Kindly choose the appropriate word for connecting the following sentences.

49. (I) The milkman in my neighborhood likes to talk to his customers.
(II) He provides them milk in every morning.
- (a) even if (b) in addition
(c) rightly (d) while

Direction (Q. 50 and Q.51): Complete the following sentences.

50. Naveen is so lazy that he
- (a) cannot depend on others for getting his work done
 - (b) cannot delay the schedule of completing the work
 - (c) can seldom complete his work on time
 - (d) dislike to postpone the work that he undertakes to do
51. "You are thinking very highly about Prashant but he is not so" means
- (a) You have a good opinion about Prashant but he is not as good as you think
 - (b) Prashant is much better, than what you think of him
 - (c) Your view about Prashant is philosophical, keep it up
 - (d) Prashant is as good as you think about him

Direction (Q.52 and Q.53): Find the erroneous part of the given sentence

52. The war of Mahabharata (a) / is the full length illustration (b) / of a righteous war (c) / No error (d)
(a) The war of Mahabharata (b) is the full length illustration
(c) of a righteous war (d) No error
53. To perform this experiment (a) / drop little sugar (b) / into a glass of water(c) / No error (d)
(a) To perform this experiment (b) drop little sugar
(c) into a glass of water (d) No error

Directions (Q.54 and Q.55): Read the following comprehension carefully and answer the questions accordingly.

One spring, while visiting in the little village among the High Mountains where her ancestors had dwelt for ____ my Aunt kindled the callow fancy of my uncle, Howard Carpenter, then an idle, shiftless boy of twenty-one.

54. Which word, if inserted in the blank, makes the most sense in the context of the passage?
(a) days (b) seasons
(c) infinity (d) generations
55. What is the meaning of the word shiftless as it is used in the passage?
(a) amiable (b) ruthless
(c) lazy (d) carefree

Directions (Q.56 and Q.57): Read the following comprehension carefully and answer the questions accordingly.

Mahatma Gandhi believed that industrialisation was no answer to the problems that plague the mass of India's poor and that villagers should be taught to be self-sufficient in food, weave their own cloth from cotton and eschew the glittering prizes that the 20th century so temptingly offers. Such an idyllic and rural paradise did not appear to those who inherited the reins of political power.

56. The meaning of 'glittering prizes that the 20th century so temptingly offers' is
(a) pursuit of a commercialised material culture (b) replacement of rural by urban interests
(c) complete removal of poverty (d) absence of violence and corruption
57. The basis of 'an idyllic and rural paradise' is
(a) rapid industrialisation of villages
(b) self-sufficiency in food clothes and simplicity of the lifestyle
(c) bringing to the villages the glittering prizes of the 20th century
(d) supporting those holdings powerful political positions

Directions (Q.58-Q.60): In questions given below, out of the four alternatives, choose the one which can best substitute the given sentence.

58. Someone who is willing to take risks or to do something shocking
(a) Bodacious (b) Risk-taker
(c) Audacious (d) Bold

59. To use special chemicals, smoke or gas to destroy the harmful insects or bacteria in a place
- (a) Spray
 - (b) Fumigate
 - (c) Decontaminate - neutralize or remove dangerous substances
 - (d) All of the above
60. It's a state in which a person has apprehensions all the time about their well-being and considers that they are ill.
- (a) Hypoallergenic
 - (b) Hypochondriac
 - (c) Hypochondria
 - (d) All of the above

A Place to Learn, A Place to Grow

ANSWER KEY
QUANT [Q1 – Q20]

1. **Answer: C**

Explanation: Given:

$$P + 2I = 800 \text{ (i)}$$

$$P + 3I = 920 \text{ (ii)}$$

Subtract (i) from (ii):

$$I = 120$$

Substitute in (i):

$$P + 2(120) = 800 \Rightarrow P = 560$$

✓ Correct option: (c)

2. **Answer: A**

Explanation: After substituting the given values and simplifying, the required value comes out to be:

6400

✓ Correct option: (a)

3. **Answer: B**

Explanation: Using the given conditions and checking each option, only option (b) satisfies all constraints.

✓ Correct option: (b)

4. **Answer: C**

Explanation: After evaluating the expression using standard algebraic simplifications, option (c) matches the required result.

✓ Correct option: (c)

5. **Answer: D**

Explanation: Given three blocks with weights:

Block	Weight	Percentage change
B1	20%	3%
B2	15%	7%
B3	32%	2%

Weighted difference:

$$(3\% \text{ of } 20) + (7\% \text{ of } 15) + (2\% \text{ of } 32)$$

$$= 0.6 + 1.05 + 0.64 = 2.29$$

Total percentage = 67%

Net result:

$$67 - 2.29 = 64.71\% \approx 64\%$$

✓ Correct option: (d)

6. **Answer: D**

Explanation: Given data is not sufficient to uniquely determine the required value.

✓ Correct option: (d) – Data Insufficient

7. **Answer: A**

Explanation: Formula for first meeting (opposite direction):

$$\text{Time} = \frac{L}{a+b}$$

Given:

$$L = 115, a = 5, b = 4$$

$$\text{Time} = \frac{115}{5+4} = 11.5 \text{ hours}$$

✓ Correct option: (a)

8. **Answer: B**

Explanation: Case I:

Selecting 3 runners from the same box:

$$5 \text{ boxes} \Rightarrow 3 \text{ ways each} \Rightarrow 15 \text{ ways}$$

Case II:

Selecting 3 runners from different boxes:

$${}^5C_3 = 10$$

Total ways:

$$15 + 10 = 25$$

✓ Correct option: (b)

9. **Answer: D**

Explanation: Arrangements using 6 colours:

Colors used	Ways
1 color	6
2 colors	$6 \times 5 = 30$
3 colors	$6 \times 5 \times 4 = 120$
4 colors	$6 \times 5 \times 4 \times 3 = 360$
5 colors	$6 \times 5 \times 4 \times 3 \times 2 = 720$
6 colors	$6! = 720$

Total:

$$6 + 30 + 120 + 360 + 720 + 720 = 1956$$

✓ Correct option: (d)

10. **Answer: D**

Explanation: Choices:

Beefless: 13

Pink Floyd: 8

MJ: 8

Madonna: 4

Total ways:

$$13 \times 8 \times 8 \times 4 = 3328$$

Excluding "no selection" case:

$$3328 - 1 = 3327$$

✓ Correct option: (d)

11. **Answer:** A

Explanation: ${}^{20}C_{16} = {}^{20}C_4$
 $= \frac{20 \times 19 \times 18 \times 17}{4 \times 3 \times 2 \times 1} = 4845$

✓ Correct option: (a)

12. **Answer:** C

Explanation: At least one black shirt:

= Total ways – No black shirt

$$= {}^9C_3 - {}^6C_3$$

$$= 84 - 20 = 64$$

✓ Correct option: (c)

13. **Answer:** C

Explanation: Circular arrangement:

$$(n - 1)! = (7 - 1)! = 6! = 720$$

✓ Correct option: (c)

14. **Answer:** A

Explanation: Given:

$$495(x - 1) - 459x = 81$$

$$495x - 495 - 459x = 81 \Rightarrow 36x = 576 \Rightarrow x = 16$$

Required spending:

$$459 \times 16 = 7344$$

✓ Correct option: (a)

15. **Answer:** A

Explanation: Present average age of 9 friends = 22

6 years ago average = 16

Total age 6 years ago:

$$9 \times 16 = 144$$

At that time, youngest was newborn $\Rightarrow$ age = 0

Sum of ages of remaining 8:

$$144$$

Average of 8 friends:

$$\frac{144}{8} = 18$$

✓ Correct option: (a)

16. **Answer:** B

Explanation: Given:

Average height of 19 persons = height of 10th person

Shortest person = 1 ft

Thus median = 19 ft

✓ Correct option: (b)

17. **Answer:** A

18. **Answer:** C

Explanation: $M + T + W = 32 \times 3 = 96$

$W + Th + F + S = 30 \times 4 = 120$

$M + T + W + Th + F + S = 26 \times 6 = 156$

Subtract:

$W = 96 + 120 - 156 = 60$

✓ Correct option: (c)

19. **Answer:** C

Explanation: Weekly income:

$4200 \times 6 = 25200$

Adjustments:

$25200 - 1200 + 1500 = 25500$

Average:

$\frac{25500}{6} = 4250$

✓ Correct option: (c)

20. **Answer:** C

Explanation: ${}^8C_3 = \frac{8!}{3!5!} = 56$

A Place to Learn, A Place to Grow

Logical Reasoning

21. **Answer:** A

Explanation: After arranging all girls as per given conditions, there is exactly 1 girl sitting between M and N.

R likes Violet & O likes brown colour.

As Yellow sits 4 places right of M : "M - - - Yellow"

It is also given that there is one person between S & Yellow, and S doesn't sit to extreme :

"M - S - Yellow"

No of girls b/w T & Violet is same as S and Blue . T sits to immediate left of black , from these statements, the only possibility becomes :

" (Blue) M R(Violet) S - T(yellow) Q(black)"

Now, as it is given that S doesn't like red & No. of girls b/w red and white is equal to white and pink (Non zero number) . This implies the possibility : "N(Red) P(Blue) M(white) R(Violet) S(pink) O(Brown) T(Yellow) Q(Black)" .

Therefore, number of girls b/w M & N is 1.

22. **Answer:** B

Explanation: T sits immediately left of Black and after arranging colors, T is found liking Yellow.

R likes Violet & O likes brown colour.

As Yellow sits 4 places right of M : "M - - - Yellow"

It is also given that there is one person between S & Yellow, and S doesn't sit to extreme :

"M - S - Yellow"

No of girls b/w T & Violet is same as S and Blue . T sits to immediate left of black , from these statements, the only possibility becomes :

" (Blue) M R(Violet) S - T(yellow) Q(black)"

Now, as it is given that S doesn't like red & No. of girls b/w red and white is equal to white and pink (Non zero number) . This implies the possibility : "N(Red) P(Blue) M(white) R(Violet) S(pink) O(Brown) T(Yellow) Q(Black)" .

Therefore, colour of T is yellow.

23. **Answer:** D

Explanation: Q is son of B. R is daughter of P. A is granddaughter of P and S is father of A, hence S is husband of P's daughter → Brother-in-law of Q.

Given that Q is the brother of R . B is the father of Q : this implies B is the father of both kids Q & R.

It is also given R is the daughter of P : this implies R is female and P is mother because already Father is deduced to be B .

So, now deduced that {B(father), P(mother)} and their kids are {Q(male), R(female)}.

It is also given "A" is grand daughter of P , and 'S' is father of A : this implies {S(male), R(female)} got married and their offspring is {A(female)}.

Now, the relation b/w Q and S are brother in laws.

24. **Answer: A**

Explanation: Odd numbered dice have even numbers on top. Using opposite faces sum =7, total dots =8.

Total 6 dices are given {I,II,III,IV,V,VI}

A dice has {1,2,3,4,5,6} on their 6 distinct faces .

Condition I : Given that sum of opposite faces of dice is 7 .

Condition II : Odd numbered dices have even number on their top face.

lets use the logic of condition I and condition II :

I Dice : (3,4) & (6,1) are given , so the other pair has to be (2,5), And using condition II, now we can say Top face is 2.

II Dice : (5,2) & (4,3) are given, so the other pair has to be (1,6) .

III Dice : (6,1) & (4,3) are given, so the other pair has to be (2,5), And using condition II, we can say Top face is 2.

IV Dice : (2,5) & (4,3) are given, so the other pair has to be (1,6).

V Dice : (1,6) & (2,5) are given, so the other pair has to be (4,3), And using condition II, we can say Top face is 4.

VI Dice : (4,3) & (5,2) are given, so the other pair has to be (1,6).

Therefore, the sum of dots on odd numbered dices = 2+2+4 = 8.

25. **Answer: C**

Explanation: Digits coded individually: $2 \rightarrow N, 3 \rightarrow P, 5 \rightarrow T, 4 \rightarrow S, 9 \rightarrow L$.
15789 is written as XTZAL and 2346 is written as NPSU.

Therefore, the code word for each letter is

X = 1

T = 5

Z = 7

A = 8

L = 9

N = 2

P = 3

S = 4

U = 6

Therefore, the code of 23549 will be NPTSL.

26. **Answer: D**

Explanation: Net displacement calculated using directional movement gives 140 m.

27. **Answer: B**

Explanation: All cats like to run. Some cats swim $\rightarrow$ those cats must also like to run.

Lets evaluate each given statement :

1. All cats who like to swim look like their masters is a wrong statement because Fact 2 & Fact 3 says that some cats likes to swim and some cats look like masters . Hence, the both set of cats need not be same.

2. Cats who like to swim also like to run . This is true statement because this can be deduced by using fact 1 & fact 2 which says all cats like to run.

3. cats who like to run doesn't look like masters is a wrong statement because there are some cats who look like their masters.

Therefore, Only II.

28. **Answer: B**

Explanation: Let Kemp = x. Given Miller = 15 > Kemp + 5 and Calvin = 8 < x → x = 9.

Let the number of night shifts done in a row by Nurse Kemp, Nurse Rogers, Nurse Miller be X, Y, Z respectively :

Given that :

$Y = 5$ & $X > Y$ this implies $X > 5$

$Z = 15$ & $Z > X + Y$ this implies $15 > X + 5$... Therefore $X < 10$

Hence, it implies X can be {6,7,8,9}.

Nurse Calvin has worked eight night shifts in a row, less than Nurse Kemp, This implies that

$X > 8$

Therefore "X" will be equal to 9.

29. **Answer: C**

Explanation: Order: $T > R > Q > P$. Second highest is R.

30. **Answer: D**

Explanation: Pattern breaks at last term.

56, 72, 90, 110, 132, 139

Difference b/w 2nd and 1st terms = $72 - 56 = 16$

Difference b/w 3rd and 2nd terms = $90 - 72 = 18$

Difference b/w 4th and 3rd terms = $110 - 90 = 20$

Difference b/w 5th and 4th terms = $132 - 110 = 22$

Difference b/w 6th and 5th term = $139 - 132 = 7$

The odd one is the last term, because it is expected to become $132 + 24 = 156$.

Therefore, 139 is the wrong term in the sequence.

31. **Answer: C**

Explanation: Arranging positions left to right places Kavikant at center.

7 boys who are standing in a row are : {Kavikanth, Anurag, Bipin, Jayanth, Gourav, Komal, Ramu} .

Kavikant is standing left to Anurag but right to Bipin : "Bipin Kavikanth Anurag"

Jayant is standing right to Gourav and left to Bipin : "Gourav Jayanth Bipin Kavikanth Anurag"

Komal is standing right to Anurag and left to Ramu : "Gourav Jayanth Bipin Kavikanth Anurag Komal Ramu"

Therefore the order is : {Gourav Jayanth Bipin Kavikanth Anurag Komal Ramu} .

Hence, the middle person standing in a row is Kavikanth.

32. **Answer:** C

Explanation: Positions difference gives 33 people in between.

Out of 78 people, Salman Khan is standing at 20th position from right .

Karan Johar is standing 25th from left ~ (78-25+1) from right i.e 54th position from right.

Therefore, No of people standing between 20th position and 54th position will be equal to $\{54-20-1\} = 33$

33. **Answer:** C

Explanation: Series: $\times 3 + 2$ pattern.

The series is 12, 38, 116, 350, 1052, ?

12

$$38 = 12 \times 3 + 2$$

$$116 = 38 \times 3 + 2$$

$$350 = 116 \times 3 + 2$$

$$1052 = 350 \times 3 + 2$$

The next term will be $1052 \times 3 + 2 = 3158$

34. **Answer:** D

Explanation: This denotes M father of N, N sister of C, C brother of F $\rightarrow$ C is son of M.

Option I shows : N is the father of C and M is the sister of N. Hence this has to be wrong.

Option II : C is the brother of N & N is the father of M . Hence this has to be wrong.

Option III : M is the sister of F & F is the father of C . hence this also wrong.

Option IV : M is the father of N, N is the sister of C & C is the brother of F, this implies C is a male and N is female such that {M,N} are kids of M (father)

Therefore answer is option IV.

35. **Answer:** B

Explanation: Same relationship: wrong act and acceptance.

Option I : Confessing is supposed to be first step to fixing theft , daring to fight isn't the same thing.

Option II : The same way you confess to theft is you admit to fault.

Option III : Committing murder doesn't fix anything instead confessing would have been same.

Option IV : Agreeing to a mistake is wrong sentence, instead admitting to mistake would have been appropriate.

Therefore, Option II is the answer.

36. **Answer:** A

Explanation: Direct syllogism conclusions.

37. **Answer:** D

Explanation: Possibility + definite negative both valid.

38. **Answer:** C

Explanation: Final arrangement shows these adjacent to Cadillac.

There are 7 different cars : {Cadillac, Ambassador, Fiat, Maruti, Mercedes, Bedford, Fargo} .

Given, Cadillac is next to the right of Fargo . Fargo is 4th to the right of Fiat : this implies "
Fiat --- Fargo Cadillac"

It is also given that Fiat which is third to the left of Ambassador, is at one end : this implies :

Fiat - - Ambassador Fargo Cadillac -

It is given Maruti car is in between Ambassador and Bedford :

Fiat Bedford Maruti Ambassador Fargo Cadillac Mercedes.

Therefore, the cars adjacent to Cadillac are { Fargo & Mercedes}.

39. **Answer:** A

Explanation: Verified from arrangement.

40. **Answer:** B

Explanation: $10 \times 4 + 4 \times 4 - 6 = 50$

A : + , B : - , C : x

$(10C4) (A) (4C4) B6 = (10 \times 4) + (4 \times 4) - 6$

$= 40 + 16 - 6 = 50$

VARC

41. **Answer:** B
Explanation: A *sedative* serves as an aid to sleep; similarly, a *mnemonic* functions as an aid to memory.
42. **Answer:** A
Explanation: The first word in each pair represents a more intense form of the second.
Jeopardy is a more severe form of *peril*, and *jealousy* is a stronger emotion than *envy*.
Hence, option (a) correctly captures the relationship.
43. **Answer:** D
Explanation: *Agog* means full of eager interest or excitement.
The word has been used correctly in the given sentence.
Correct Answer: (d)
44. **Answer:** D
Explanation: *Tantamount* means equivalent in seriousness or effect; as good as.
The usage in the sentence is accurate.
Correct Answer: (d)
45. **Answer:** C
Explanation: One of the key themes highlighted is ensuring that students have easy access to appropriate learning material, especially in their own languages, as this leads to better understanding of subjects.
Correct Answer: (c)
46. **Answer:** C
Explanation: The sentence correctly conveys that although the unemployment rate has dropped sharply this quarter, the improvement may only be temporary.
Correct Answer: (c)
47. **Answer:** C
Explanation: Doordarshan's promotions must go beyond mere reporting of facts and should capture the story between the lines. Given India's vast population, linguistic diversity, and varied lifestyles, it is unrealistic to address everyone simultaneously.
Correct Answer: (c)
48. **Answer:** B
Explanation: In contemporary usage, *secularism* has come to mean the preservation of religious minorities in their traditional modes. It is ironic that minorities are identified primarily by religion rather than by community or profession.
Correct Answer: (b)
49. **Answer:** D
Explanation: The sentence is grammatically correct and clearly states that the milkman talks to his customers while delivering milk every morning.
Correct Answer: (d)

50. **Answer:** C
Explanation: The sentence correctly conveys that Naveen's laziness prevents him from completing his work on time.
Correct Answer: (c)
51. **Answer:** A
Explanation: Thinking very highly of Prashant implies having a better opinion of him than he actually deserves. Hence, the statement fits option (a).
Correct Answer: (a)
52. **Answer:** A
Explanation: The correct expression is "the war of the Mahabharata", as it refers to a specific epic event.
Correct Answer: (a)
53. **Answer:** B
Explanation: The article "a" should be dropped before *little sugar*, as *little* already functions as a determiner.
Correct Answer: (b)
54. **Answer:** D
Explanation: The sentence is grammatically correct and requires no improvement.
Correct Answer: (d)
55. **Answer:** C
Explanation: *Shiftless* means lazy and lacking purpose or ambition, which fits the context perfectly.
Correct Answer: (c)
56. **Answer:** A
Explanation: The passage clearly states that Gandhi believed Indian villages should be self-sufficient and should avoid dependence on commercialised material culture.
Correct Answer: (a)
57. **Answer:** B
Explanation: The passage explains that the idyllic rural paradise refers to self-sufficiency in food and clothing, along with a simple lifestyle.
Correct Answer: (b)
58. **Answer:** C
Explanation: *Audacious* means showing a willingness to take bold or daring risks.
Other options do not convey this precise meaning.
Correct Answer: (c)
59. **Answer:** B
Explanation: A *sedative* helps induce sleep; similarly, a *mnemonic* acts as an aid to memory.
The analogy is correctly represented.
Correct Answer: (b)
60. **Answer:** C
Explanation: *Hypochondria* refers to illness anxiety disorder, where a person is excessively worried about having a serious illness.
Correct Answer: (c)
